

Airbus A320 Family (CEO & NEO) B1 + B2 CONTINUATION TRAINING

Course overview

This Continuation Training course provides an updated technical review of the Airbus A320 Family (CEO & NEO) from a B1/B2 perspective.

It ensures that certifying and support staff remain current with recent in-service experience, regulatory updates and maintenance developments affecting the fleet, focusing on real operational cases, technical findings and applicable airworthiness requirements impacting airframe, engines and aircraft systems.

Adressed to

- Licensed B1 and B2 technicians
- Part-145 maintenance personnel
- Engineering & CAMO staff
- A320 type-rated certifying staff requiring continuation training compliance

* For on-site training options, please contact us directly at 147@brok-air.com.
Please note: The indicated price applies exclusively to the online self-study format. Classroom or instructor-led sessions are available upon request and subject to a separate quotation.

- Format: Self-study (updated training presentation) or instructor-led session (on request) *
- Language: English
- Certification: Certificate of Attendance
- **Price (Online Self-Study Version): 80.00 €**

Course Content

The course delivers a consolidated review of recent In-Service Experience (ISE), including Airbus WISE publications, Technical Follow-Up (TFU) and In-Service Information (ISI), together with significant technical events affecting systems, structures, landing gear, brakes and engines. It also covers applicable EASA Airworthiness Directives (ADs) and relevant Service Bulletins (SBs), highlighting their operational and maintenance impact. The training addresses key considerations derived from fleet feedback and regulatory updates to ensure continued technical awareness and compliance.
