

Airbus A318/A319/A320/A321 (CFM56)

General Familiarization Course

Course overview

This course provides an introduction to aircraft systems, structure, and basic operational principles, in accordance with EU Regulation 1321/2014 – Part-66, Appendix III, Level 1 requirements. It is designed to deliver fundamental knowledge of the aircraft, focusing on general system layout, safety aspects, and maintenance awareness. The course does not lead to a type rating endorsement but supports the initial familiarisation of personnel involved in aircraft maintenance environments.

Adressed to

- Entry-level aircraft maintenance personnel
- Non-licensed technicians starting their career in aviation
- Maintenance Support Staff (MCC), CAMO and Engineering departments
- Personnel requiring a general familiarisation with the aircraft
