Boeing B737 Family (NG & MAX) B1+B2 CONTINUATION TRAINING

Course overview

This Continuation Training course for the Boeing B737 Family (NG & MAX) provides an updated technical and operational review based on recent in-service experience, regulatory developments and fleet reliability topics.

It is designed to maintain and refresh the knowledge of certifying staff in accordance with EASA Part-145 and Part-66 continuation training requirements, ensuring continued airworthiness awareness and operational safety.

Adressed to

- Licensed B1 and B2 technicians
- Part-145 maintenance personnel
- Engineering & CAMO staff
- B737 type-rated certifying staff requiring continuation training compliance

* For on-site training options, please contact us directly at 147@brok-air.com.
Please note: The indicated price applies exclusively to the online self-study format. Classroom or instructor-led sessions are available upon request and subject to a separate quotation.

Course details

- Duration: 6 hours
- Format: Self-study (updated training presentation) or instructor-led session (on request) *
- Language: English
- Certification: Certificate of Attendance

- **Price (Online Self-Study Version): 80.00 €**

Course Content

The course includes a consolidated review of recent Airworthiness Directives (ADs), Fleet Team Digests (FTD), Safety Alerts for Operators (SAFO) and other relevant regulatory publications affecting the B737 NG and MAX fleets.

It analyses key in-service technical events—covering flight controls, engines, electrical systems, environmental control systems, structural matters and reliability trends impacting dispatch and maintenance practices.

A structured systems overview is also provided to refresh core knowledge.
